Reviewer's report

**Title:** Array comparative genomic hybridization and flow cytometry analysis of spontaneous abortions and mors in utero samples

**Version:** 2 **Date:** 17 July 2009

**Reviewer:** Howard R Slater

**Reviewer's report:**

I am happy with the responses given to my questions with the exception that there is still no description or reference in Methods of how the uncultured single cell preparations from fetal skin, umbilical cord or placenta are made. This is bound to be of interest to anyone who wishes to follow your method.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
