Reviewer's report

Title: No association of the polymorphisms of the frizzled-related protein gene with peak bone mineral density in Chinese nuclear families

Version: 3 Date: 16 November 2009

Reviewer: Antonio Gonzalez

Reviewer's report:

The authors have provided satisfactory responses to all my comments. I am only concerned by some sentences that will require further linguistic revision.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have not conflict of interest to declare
