Reviewer's report

Title: Search for Copy Number Variants in Chromosomes 15q11-q13 and 22q11.2 in Obsessive Compulsive Disorder

Version: 1 Date: 9 February 2010

Reviewer: Humberto Nicolini

Reviewer's report:

• Major Compulsory Revisions (which the author must respond to before a decision on publication can be reached)
  The lack of detection of cases needs to be better demonstrated. Even thought, it is mentioned that positive controls were used there is no figures showing these results. Also, the lack of a control group needs to be commented.
  Minor revisions: Clinical sample There is no mentioned if there is family history of mental retardation or OCD or tics. There is no mention of tic comorbidity. There is no mention of cognitive assesment or neuropsychological testing to determine IQ.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
