Reviewer's report

Title: Association of the eNOS E298D polymorphism and the risk of myocardial infarction in the Greek population

Version: 2 Date: 20 April 2010

Reviewer: Stavroula Kanoni

Reviewer's report:

The authors have sufficiently addressed all comments and revised the manuscript accordingly.

Discretionary Revisions
1. The authors should justify their selection of the cut-off point of 60 years of age, for the use of age as a nominal variable in their analyses (Tables 1 and 4).

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
