Reviewer's report

Title: The dopamine beta-hydroxylase -1021C/T polymorphism is associated with the risk of Alzheimer's disease in the Epistasis Project

Version: 2 Date: 27 October 2010

Reviewer: Joseph F. Cubells

Reviewer's report:

The authors have thoughtfully and comprehensively addressed the concerns of all reviewers. The changes have substantially strengthened the manuscript. The results are timely and should be of substantial interest to the AD research community.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
