Reviewer's report

Title: A Novel Mutation in the Glycogen Synthase 2 Gene in a Child with Hypoglycemia Due to Glycogen Storage Disease Type 0

Version: 4 Date: 12 November 2009

Reviewer: David A Weinstein

Reviewer's report:

The revised manuscript is much better, and I find it acceptable for publication. The diagnosis and report of a new mutation are very convincing. While more research will be needed to determine if haploinsufficiency causes mild symptoms of the disorder, the findings are plausible. This case report should stimulate new research on haploinsufficiency, and this is a valuable contribution to the field.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
