Reviewer's report

Title: Association of IL1A and IL1B loci with primary open angle glaucoma

Version: 3 Date: 2 November 2009

Reviewer: Akira Matsuda

Reviewer's report:

I think the study is too premature for publication because of small number of the samples for relatively common disease with low odds ratio like 1.5-1.7. It needs more samples for draw conclusions.

Probably only ophthalmologist have interest for this matter.
