Reviewer's report

Title: Molecular and Neurological Characterizations of three Saudi Families with Lipoid Proteinosis

Version: 2 Date: 27 January 2011

Reviewer: sheng xiang xiao

Reviewer's report:

"These individuals illustrate the neurologic spectrum of LP, including variable mental retardation, personality changes, and mesial temporal calcification but imply that significant neurologic involvement may be somewhat less common that previously thought." This sentence is insufficient evidence

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
