Reviewer's report

Title: Genetic variants in RET and risk of Hirschsprung's disease in Southeastern Chinese: a haplotype-based analysis

Version: 2 Date: 25 January 2011

Reviewer: Matthew G Sampson

Reviewer's report:

The authors have addressed the questions that I had in my initial review, strengthening the major points of this study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
