Reviewer’s report

Title: Prediction of lung cancer risk in a Chinese population using a multifactorial genetic model

Version: 3 Date: 28 September 2012

Reviewer: Jianxin Shi

Reviewer’s report:

Two comments:
1. Abstract--> background, last sentence is incomplete.
2. Table 2: put the risk allele into the table. Is the Phwe based on controls?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
