Reviewer’s report

Title: HIGH RESOLUTION MELTING: improvements in the genetic diagnosis of Hypertrophic Cardiomyopathy in a Portuguese cohort

Version: 2 Date: 17 January 2012

Reviewer: Christian Prinz

Reviewer’s report:

Santos et al. demonstrated in their paper that HRM is innovative and low cost technique for genotyping of HCM.

The authors have submitted a carefully revised manuscript taking into consideration all previous reviewers comments.

This has strengthened the whole paper and made it suitable for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
