Reviewer's report

Title: Possible role of EMID2 on nasal polyps pathogenesis in Korean asthma patients

Version: 1 Date: 7 August 2011

Reviewer: Qiji Liu

Reviewer's report:

Dr. Pasaje and colleagues has investigated EMID2 gene polymorphisms in the pathogenesis of Nasal polyps in Korean asthma patients. The SNPs analysed in the study is reasonable. However the sample size is limited, to exclude the false negative result, what is the statistical power of the sample size?

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
