Title: Relationships between the ABO blood group SNP rs505922 and breast cancer phenotypes: a genotype-phenotype correlation study

Version: 1 Date: 11 March 2012

Reviewer: Mingzhou Guo

Reviewer's report:

Seth Rummel et al entitled “Relationships between the ABO blood group SNP rs505922 and breast cancer phenotypes: a genotype-phenotype correlation study” is a short report. The work is simple but the result is reliable. Even through they got negative result but is publishable.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
