Reviewer’s report

Title: Genetic variants influencing breast size also influence breast cancer risk

Version: 2 Date: 9 April 2012

Reviewer: Amanda Toland

Reviewer’s report:

The authors have been largely responsive to the previous concerns.

Major:
In this revised manuscript they do not outline study limitations, in particular, the weakness of using self-reported information which may not be as accurate as other pieces of information. The authors should include a sentence or two on study limitations and how this may affect their results.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
