Reviewer’s report

Title: T786->C polymorphism of the endothelial nitric oxide synthase gene is associated with insulin resistance in patients with ischemic or non ischemic cardiomyopathy

Version: 1 Date: 30 July 2012

Reviewer: Lin Zhang

Reviewer's report:

1. Besides T#786#C eNOS polymorphism, there is a polymorphism of eNOS I/D, why not detect the eNOS I/D polymorphism?
2. The sample size in this study is so small that the statistical power is limited. Additionally, the significance is marginal.
3. The data should be adjusted, at least by gender, age, smoking status.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
