Reviewer's report

Title: The association between the angiotensin-converting enzyme-2 gene and blood pressure in a cohort study of adolescents

Version: 2 Date: 24 July 2013

Reviewer: Barry Palmer

Reviewer's report:

The authors have revised the manuscript in response to my review and that of a second reviewer and I find the changes satisfactory and now recommend publication.

However I notice that Supplementary Table B makes no mention of units (mm Hg), which should be amended as part of the final editing process.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
