Reviewer's report

Title: Influence of FTO variants on obesity, inflammation and cardiovascular disease risk biomarkers in Spanish children: a case-control multicentre study.

Version: 1 Date: 12 August 2013

Reviewer: Vanessa Sune Mattevi

Reviewer's report:

Minor Essential Revisions:
1 – Abstract – line 34 – “...this association has not been shown…”
2 – Statistical analysis – line 171 – the authors should present references for the R package, as it is not as widely known as SPSS, for instance.
3 – Discussion – line 256 – “and skin folds …”
4 – Discussion – line 290 – “it has been demonstrated that…”

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
