Reviewer's report

Title: Dystonia, facial dysmorphism, intellectual disability and breast cancer associated with a chromosome 13q34 duplication and overexpression of TFDP1: Case report

Version: 2 Date: 17 May 2013

Reviewer: Daniela Turchetti

Reviewer's report:

The revised version of the paper looks greatly improved and definitely worthy of publication.

The only suggestion I have is to add in the discussion a sentence about the possibility that breast cancer could have been favoured by the therapy.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
