Reviewer's report

Title: Cancer-testis gene expression correlates with the methylenetetrahydrofolate reductase 677CC genotype in non-small cell lung carcinoma

Version: 1 Date: 29 May 2013

Reviewer: Pooneh Mokarram

Reviewer's report:

Minor points
in Table 1
There is no explanation why the author divide age based on age 60.
In Table 2, the author should explain different genotype distribution among CT+ and CT-. For example, how many samples have CC(MTHFR)/AA(MTHFR)/AA (MTR)/......... genotype combination.
In table 3, There is no information about "OR" and how ORs were adjusted.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
