Reviewer’s report

Title: A PARK2 Polymorphism (rs1784594) Associated with Delayed Neuropsychological Sequelae after Carbon Monoxide Poisoning

Version: 3 Date: 30 July 2013

Reviewer: ana bakija-konsuo

Reviewer’s report:

Thank you for the opportunity of reading this manuscript. I really enjoyed reading it.

The paper is written in a clear and concise way, materials and methods are valid and well described. The shown results represent the base for further investigations of the role of PARK2 mutations in neurodegeneration.

In my opinion, the manuscript should be published because it would be interesting and useful for all of your readers who are engaged in this area. I hope they will have benefits from reading it.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
