Reviewer's report

Title: Molecular characteristics of mismatch repair genes in sporadic colorectal tumors in Czech patients

Version: 2 Date: 27 January 2014

Reviewer: Tatyana Vlaykova

Reviewer's report:

The new revised version of the manuscript entitled: “Molecular characteristics of mismatch repair genes in sporadic colorectal tumors in Czech patients” (old name: “Expression levels and promoter methylation of mismatch repair genes in sporadic colorectal cancer in the Czech Republic”) is changed accordingly to most of suggested comments. I agree with other comments of the authors. Thus, I am satisfied by the revised version and suggest this manuscript to be accepted for publication in BMC Medical Genetics without any further corrections.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
