Reviewer's report

Title: Novel mutations of PKD genes in Czech population with autosomal dominant polycystic kidney disease

Version: 2 Date: 24 January 2014

Reviewer: Fiona Karet

Reviewer's report:

Most of my comments have been addressed.

Compulsory revisions:

1. details of the cohort belong in results not methods.
2. Language editing is badly needed. Sentence construction is the main problem ('the' used in the wrong place in a sentence etc)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No competing interests
