Reviewer's report

Title: CCL3L1 copy number, CCR5 genotype and susceptibility to Tuberculosis

Version: 2
Date: 17 December 2013

Reviewer: Alessandra Pontillo

Reviewer's report:

Major Compulsory Revisions: The study is focus on TB, however in Africa the rate of HIV-TB co-infection is high, and considering that genetic variations analyzed in this paper are risk factors for HIV-1, maybe the exclusion of HIV-1 infection help to better characterize the studied cohort.

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
