Reviewer’s report

**Title:** The effect of homozygous deletion of the BBOX1 and Fibin genes on carnitine level and acyl carnitine profile

**Version:** 3  **Date:** 5 June 2014

**Reviewer:** audrey boutron

**Reviewer’s report:**

The revised manuscript is in good agreement with asked revisions

Discretionary Revisions:

1- Title should be in adequation with the revised manuscript ie : A 241kb pair 11-chromosomal deletion covering the BBOX1 and FIBIN genes in a patient with microcephaly

2- table 3 mean from two measurements at two different age (42 and 60 months) is quite irrelevant

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
