Reviewer's report

**Title:** Array-CGH analysis in Rwandan patients presenting Development Delay/Intellectual Disability with Multiple Congenital Anomalies

**Version:** 1  **Date:** 26 April 2014

**Reviewer:** Jean-Paul Misson

**Reviewer's report:**

The present paper report the résultats of genetic workup performed in Rwanda. Due to the local conditions it is Easy to understand the relative small size of this série. Thus it should be considered as quite exceptional. Indeed This paper show that such évaluation and testing are feasable and should be stimulated in other régions or countries. To m'y point of view this is à suffiicient reason to accept this paper for publication.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I déclaré that I have no competing interests'.
