Reviewer's report

Title: No Evidence for the Association of DRD4 with ADHD in a Taiwanese Population
Within-Family Study

Version: 2 Date: 14 June 2005

Reviewer: Robert K Moyzis

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

This revised MS has now incorporated most of the concerns of the previous reviewers. A minor error should be corrected. The ref 45 study is cited throughout the MS as a "clinical Taiwanese ADHD sample". It is a Hong Kong ADHD sample. This error should be corrected.

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:

In my prior review, I outlined my potentially competing interests, which I believe do not influence my review.
