Reviewer’s report

Title: The frequent BRCA1 mutation 1135insA has multiple origins: a haplotype study in different populations

Version: 4 Date: 12 December 2005

Reviewer: Heli Nevanlinna

Reviewer’s report:

General

The authors have revised the manuscript as suggested. I have no further comments.

-------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No
