Reviewer’s report

Title: The E670G SNP in the PCSK9 gene is associated with polygenic hypercholesterolemia in men but not in women

Version: 4 Date: 12 July 2006

Reviewer: AJ Marian

Reviewer’s report:

General

--------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Please add the power of the study to the discussion (as you have indicated in the response to my comments).
--------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
--------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

--------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No
