Reviewer's report

Title: Evidence for association between the HLA-DQA locus and abdominal aortic aneurysms in the Belgian population: a case control study

Version: 2 Date: 21 July 2006

Reviewer: Christian Götting

Reviewer's report:

General

The authors have satisfactorily addressed the mentioned concerns in the revised manuscript. Unfortunately, none of the results remained significant after Sidak correction for multiple testing which is a major drawback for the study.

What next?: Accept without revision
