Reviewer’s report

Title: Large Genomic Rearrangements in the CFTR Gene Contribute to CBAVD

Version: 2 Date: 29 March 2007

Reviewer: Sabina Gallati

Reviewer’s report:

General
The manuscript has been adequately revised. Considering the detailed presentation of the two deletions and the nomenclature I can follow the authors arguments from the educational point of view and accept their presented formulation and merging of figure 1 and 2.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
