Reviewer's report

Title: Association Analysis of Chromosome 1 Migraine Candidate Genes

Version: 3 Date: 11 June 2007

Reviewer: Pasquale Montagna

Reviewer's report:

General
Review of manuscript “Association analysis of Chromosome 1 migraine candidate genes”.
This paper has been revised and some typographical errors have been corrected. Moreover, some possible misunderstandings have been clarified (whether a population or hospital based sample: its being a population sample adds in my opinion to the relevance of the finding), and possible power size limitations acknowledged. Except for a few typos, (such as: Cephalgia in ref 1 should be Cephalalgia; ref 13 in page 5 line 10 is probably wrong; ref 23 should be 24 in page 10 line 11), I have no further criticism to offer at this revised text

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
