Reviewer's report

Title: Gene sequence variations of the platelet P2Y12 receptor are associated with coronary artery disease.

Version: 3 Date: 6 August 2007

Reviewer: Jean-Luc Reny

Reviewer's report:

General
the authors have properly addressed the different issues and modified the manuscript accordingly.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
none

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
none

Discretionary Revisions (which the author can choose to ignore)
none

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I hold a patent related to the initial description of the H1/H2 polymorphism and its relation with symptomatic atherothrombosis. Aside from this patent I declare that I have no competing interests.
