Reviewer's report

Title: Genetic variants of Complement factor H gene are not associated with premature coronary heart disease: a family-based study in the Irish population

Version: 2 Date: 12 July 2007

Reviewer: Andrew Lotery

Reviewer's report:

General
Nice paper which adopts a relatively novel approach, adds to the literature and is well written.

-------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
none

-------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
none

-------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)
none

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
