Reviewer's report

Title: Missense mutations in Desmocollin-2 N-terminus, associated with Arrhythmogenic right ventricular cardiomyopathy, affect intracellular localization of desmocollin-2 in vitro

Version: 3 Date: 4 October 2007

Reviewer: Ferhaan Ahmad

Reviewer's report:

General

The authors appear to have addressed the major suggestions and comments of the other reviewers and myself. Please see below for a minor essential revision.

------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The designation 1034T>C has been incorporated into the text, but not in the legend to Figure 1 or in Table 2.

------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

------------------------------------------------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
