Reviewer’s report

Title: The intron 4c allele of the NOS3 gene is associated with ischemic stroke in African Americans

Version: 3 Date: 7 November 2007

Reviewer: Craig Lee

Reviewer’s report:

General
Grewal et al. have substantially improved their manuscript by responding to reviewer comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Discretionary Revisions (which the author can choose to ignore)
None

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
