Title: TCF7L2 variant genotypes and type 2 diabetes risk in Brazil: significant association, but not a significant tool for risk stratification in the general population

Version: 2 Date: 15 October 2008

Reviewer: André Scherag

Reviewer’s report:

In the revised version of the 'TCF7L2 variant genotypes and type 2 diabetes risk in Brazil: significant association, but not a significant tool for risk stratification in the general population' Marquezine et al. address all my previous remarks; to me no further revisions are necessary. I thank the authors for their balanced work.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
