Reviewer's report

Title: Failure to replicate an association of SNPs in the oxidized LDL receptor gene (OLR1) with CAD

Version: 1 Date: 4 March 2008

Reviewer: Colin Palmer

Reviewer's report:

The authors have performed additional analysis to exclude the possibility that study design heterogeneity is not responsible for the different results in the two studies and have discussed the limitations of the study appropriately.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
