Reviewer's report

Title: N-acetyltransferase 8, a positional candidate for blood pressure and renal regulation: resequencing, association and in silico study

Version: 1 Date: 12 November 2007

Reviewer: David E Comings

Reviewer's report:

General
No recommended revisions

-------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
