Reviewer's report

Title: N-acetyltransferase 8, a positional candidate for blood pressure and renal regulation: resequencing, association and in silico study

Version: 2 Date: 24 January 2008

Reviewer: patricia Munroe

Reviewer's report:

I have checked all the edits put forward by the authors to my queries and all have been addressed to my satisfaction. Some editing on use of language is required as small words are missing and it is not so clear in places.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests: I declare that I have no competing interests.
