Reviewer's report

Title: Minisequencing mitochondrial DNA pathogenic mutations

Version: 3 Date: 19 March 2008

Reviewer: Veronique Paquis-Fluckinger

Reviewer's report:

This new version is satisfactory. The authors have highly improved the quality of the paper. All comments have been taken into account except for figure 2 which does not contain the sequence electrophoregrams corresponding to each pattern. Nevertheless, the manuscript can be accepted for publication.
