Reviewer's report

Title: A Novel De Novo Mutation in the Serine-Threonine Kinase STK11 Gene in a Korean patient with Peutz-Jeghers Syndrome

Version: 1 Date: 30 October 2007

Reviewer: Rodney J. Scott

Reviewer's report:

General
The manuscript details a de novo mutation in the STK11 gene. The mutation has not been identified before and is associated with a single case of Peutz-Jeghers Syndrome.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct) There are a number of spelling mistakes and grammatical errors that need to be addressed.

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Reject because too small an advance to publish

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
