Reviewer's report

Title: Diagnostic yield of renal biopsies: a retrospective single center review

Version: 1 Date: 7 April 2009

Reviewer: Hee Gyung Kang

Reviewer's report:

1. This is a well-designed and well-described study giving practical information for pediatric nephrologists performing kidney biopsy.
2. Discretionary Revisions; since categorization of biopsy is an important theme in this study, for the reader’s easier understanding, addition of a table describing the categories would be helpful. Or, instead of showing the number of the categorized in Figure 2, showing short description of the categories would make the authors’ idea more clear to the readers.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
