Reviewer's report

Title: Association between routine and standardized blood pressure measurements and left ventricular hypertrophy among patients on hemodialysis

Version: 5 Date: 7 June 2010

Reviewer: Mahboob Rahman

Reviewer's report:

As a "minor essential" revision, I would ask the authors to comment on home and ambulatory blood pressure measurements in the diagnosis of hypertension in HD patients, and how lack of that information is a limitation in this study.

The manuscript is otherwise acceptable.
