Reviewer's report

Title: Biopsy proven acute interstitial nephritis after treatment with moxifloxacin

Version: 1 Date: 17 March 2010

Reviewer: Mark A Perazella

Reviewer's report:

The authors describe a case of AIN due to moxifloxacin. They prove that it is AIN with the renal biopsy and the temporal association of drug administration and development of the renal syndrome is consistent. The discussion and conclusions are appropriate. I have no issues that need to be addressed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
