Reviewer’s report

Title: Lipoprotein lipase responds similarly to tinzaparin as to conventional heparin during haemodialysis

Version: 1 Date: 14 September 2010

Reviewer: Halima Resic

Reviewer’s report:

Prof. Dr Halima Resic
1. The aim of the study is well defined and methods are well described, only it is necessary to describe Transonic methods more detailed.
2. Results are presented clear and with acceptable statistically methods, and will be better that is larger number of patients included in this research which is very good designed, but it is not so important.
3. Discussion is well concipated because are still lipid profile od hemodialysis patients and effects of anticoagulation are subject of different studies which is reported different results and conclusions.
4. Conclusion are clear and i have think that research like this need to be continued.
5. The title of abstract accurately convey what has been found

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
