Reviewer's report

Title: Efficacy of an internet-based tool for improving physician knowledge of chronic kidney disease: an observational study

Version: 1 Date: 29 June 2012

Reviewer: kenar jhaveri

Reviewer's report:

Discretionary Revision

How quickly did the residents take the post test? Within hours after the module or days? Was there any tests administered to test their retention few months later? This is important as spaced learning has shown to be more effective than post test evaluations only, This might be a limitation of the study.
Please address the above point.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
