Reviewer’s report

Title: Serum vaspin levels are reduced in Japanese chronic hemodialysis patients

Version: 2 Date: 9 June 2012

Reviewer: Denise Mafra

Reviewer's report:

The questions posed by the authors were not well defined. The authors did not show the importance to study vaspin. The text is confused. The discussion and conclusions were not well balanced and adequately supported by the data. The abstract is not good.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
