Title: Assessment of renal function in mice with unilateral ureteral obstruction using 99mTc-MAG3 dynamic scintigraphy

Version: 1 Date: 9 July 2012

Reviewer: Seokhwa Choi

Reviewer’s report:

This work can bring strong information about the useful of 99mTc-MAG3 dynamic scintigraphy in view to perform renal function.

This is neatly conducted and nicely written study. I kindly comment about the article # 1383657750748593:

- Page numbers should be placed at bottom of each page.
- In reference 9, in press manuscript is difficult.
- Journal titles in References are abbreviated in accordance with the style of index medicus (exemple 13, 14, 24, 29).
- The histological pictures need explain of the details (T1W and T2W in Figure 1).
