Reviewer's report

Title: Epidemiology and Aetiology of Dialysis-treated End-Stage Kidney Disease in Libya

Version: 2 Date: 8 March 2012

Reviewer: Alaa Sabry

Reviewer's report:

The article entitled: 'Epidemiology and Aetiology of Dialysis-treated End-Stage Kidney Disease in Libya' by Wiam A Alashek et al describe the magnitude of ESRD in Libya, the commonest causes, gender and age distribution.

The paper is well written, the question posed by the authors well defined, the methods appropriate and well described?

The discussion and conclusions well balanced and adequately supported by the data, also the limitations of the study was mentioned.

I advise to accept the paper without further corrections.

Regards

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
