Reviewer's report

Title: Limited Knowledge of Chronic Kidney Disease Among Primary Care Patients - A Cross-sectional Survey

Version: 2 Date: 25 April 2012

Reviewer: Laura Plantinga

Reviewer's report:

In general, the authors have responded thoughtfully to my comments. While the questionnaire has substantial flaws, the authors have done a better job describing its development and testing, and also do not overstate the results.

Minor essential revisions
1. I am still concerned about question 4 (early symptoms) and would like to see sensitivity analyses where "all of the above" is considered a correct answer. I see the authors' point that they are not symptoms of "early" disease but I am not sure that was clear in the wording of the question.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
